Judging Criteria

College IPL Auction 2026 · how judges score each team, and how the winning team is decided

10	7	₹100 Cr	100	Average
IPL franchises	players per squad 1 WK · 2 BAT · 2 AR · 2 BOWL	purse per team max 4 overseas	points: 60 worked out by the app + 40 by judges	of the judges decides the winner

Every team ends with exactly 7 players in the same shape (1 wicketkeeper, 2 batters, 2 all-rounders, 2 bowlers), so judges don't check *whether* a team has the right roles, but **how good, how well balanced and how well bought** its 7 players are. Four criteria (60 points) are **worked out by the app** from the squads, the same for every judge; each judge scores the other five (40 points) in steps of 0.5.

The nine criteria

CRITERION	POINTS	WHAT COUNTS
⭐ **Average Player Rating** 🤖 worked out by the app	**20**	The average rating of the team's 7 players. **1 point for every rating point above 75**, up to 20. **95+** → 20 · **92** → 17 · **90** → 15 · **88** → 13 · **85** → 10 · **82** → 7 · **80** → 5 · **75 or less** → 0
💰 **Value for Money** 🤖 worked out by the app	**20**	**High-rated players for low money.** The app works out the squad's *fair price*: what players of those ratings cost in this auction (from the prices actually paid; a higher rating is worth more). Paying exactly the fair price = 10; every 5% below it adds 1 point, every 5% above takes 1 away. **paid 50% below fair** → 20 · **25% below** → 15 · **fair** → 10 · **25% above** → 5 · **50% above** → 0. Unspent purse only counts through this.
⚖️ **Balanced Team Combo** 🤖 worked out by the app	**10**	Are the keeper, the batters, the all-rounders and the bowlers **all equally strong**? The app compares the average rating of each role group: the gap between the strongest and the weakest group. **gap 5 or less** → 10 · **10** → 8 · **15** → 6 · **20** → 4 · **25** → 2 · **30+** → 0
🔀 **Batting–Bowling Combination** 🤖 worked out by the app	**10**	Three parts: **left- and right-hand batters** among the 5 batting options (keeper, batters, all-rounders): 2 or more of each = 3.5, only 1 of one hand = 2, all the same = 0 · **pace and spin** among the 4 bowling options (bowlers, all-rounders): scored the same way, 3.5 / 2 / 0 · **batting as strong as bowling**: 3, minus 1 for every 3 points between the app's batting and bowling strength bars.
💪 **Team Strength & Match Winners**	**15**	Beyond the average: proven match winners, big-match players, form and IPL records. A squad with no weak link beats one with two stars and five fillers. **13–15** several match winners, no weak link · **9–12** strong core · **5–8** a mix · **0–4** few real threats
🔄 **Versatility**	**10**	Players who do more than one job: all-rounders who really bat *and* bowl, a keeper who opens or finishes, bowlers who can bat, 🔄 Versatile tags. **9–10** several multi-skill players · **6–8** the all-rounders deliver · **3–5** little cover · **0–2** one-dimensional
🏏 **Batting Depth**	**6**	How far down the 7 can bat: openers, an anchor, finishers and power hitters; runs and strike rate. **5–6** bats deep · **3–4** solid · **1–2** thin · **0** weak
🎯 **Bowling Strength**	**6**	The 4 bowling options: wicket-takers, economy, death bowling. **5–6** four strong options · **3–4** good · **1–2** weak overs · **0** weak
🧤 **Wicketkeeping & Fielding**	**3**	The keeper's quality behind the stumps and with the bat; gun fielders and safe hands. **3** top keeper and fielders · **2** good · **1** average · **0** weak
Total	**100**	60 automatic + 40 from each judge

How the winning team is decided

> **Where to find the facts:** the **Judging** page fills in the four 🤖 criteria for every team by itself. **Reports** has each team's squad, prices, spend and a Team analysis; the hints under the judges' boxes come from the ratings and prices. They are a guide: the judges decide their 40 points.

1. After the hammer
The auction ends when every squad has its 7 players. Open **Reports** on the projector or a laptop.

2. Team pitch (optional)
Each team owner gets 1 minute to explain their squad and plan.

3. Score alone
Each judge scores every team on their 5 criteria, without discussing scores first.

4. Enter the scores
On the **Judging** page, each judge has a tab; type in the 5 judged scores. The 4 automatic ones are already there.

5. Standings
The app averages the judges who scored. The highest average wins.

The result

- **Winner – 🏆 Auction Champions:** the team with the highest **average total out of 100** across all judges. Second place is the runner-up.
- **All judges score all teams.** The standings average whichever judges have scored so far and show which teams still have missing scores, so wait until every score is in before announcing the winner.
- Use the same scale for every team. If a judge sees they were too harsh or generous on the first team, adjust before the scores are final, not after the standings appear.
- Scores are final once the head judge announces them. Show the winner on the projector with 📣 **SHOW ON SCREEN** under 🏆 Auction Champions.

If two teams tie on the average

1. More points for ⭐ **Average Player Rating**.
2. Still tied: more points for 💰 **Value for Money**.
3. Still tied: higher judges' average for 💪 **Team Strength & Match Winners**.
4. Still tied: the judges vote between the tied teams; the head judge has the casting vote.

Rules for judges

- Judge the **squad**, not the owners' bidding drama, team spirit or how loud the supporters were.
- A judge who is linked to a team (friend, classmate, owner) should say so before scoring; the head judge can ask them to skip that team, and the app then averages the other judges.
- Judge every team against the same players: the IPL ratings and records shown in the app, not personal favourites.
- Mystery players and wild cards count like any other player once bought.

Fun awards (separate from the score)

These don't change the winner. The Judging page suggests a team for each from the auction stats; the judges can accept the suggestion or pick another.

🏆 **Auction Champions** – top of the judges' table	💰 **Biggest Purchase** – most expensive player
💎 **Best Value Buy** – best player for the price	🤑 **Biggest Bargain** – top player bought at base price
🔥 **Biggest Bidding War** – most bids on one player	💀 **Purse Destroyer** – team that spent the most
🕵️ **Best Mystery Player** – best mystery buy	😂 **Funniest Purchase** – the judges' choice
Best Wild Card – best wild card buy	

> **After the ceremony: Reports → Exports** saves the final judging scores and awards as CSV, Excel or PDF, together with the squads and every sale.

Judge's Score Sheet

One sheet per judge · scores in steps of 0.5 · enter them on the app's Judging page afterwards

Judge: _____ Signature: _____ Date: _____

TEAM	⭐ AVG RATING / 20 · APP	💰 VALUE / 20 · APP	⚖️ COMBO / 10 · APP	🔀 BAT–BOWL / 10 · APP	💪 STRENGTH / 15	🔄 VERSATILITY / 10	🏏 BATTING / 6	🎯 BOWLING / 6	🧤 WK & FIELD / 3	TOTAL / 100
Chennai Super Kings										
Delhi Capitals										
Gujarat Titans										
Kolkata Knight Riders										
Lucknow Super Giants										
Mumbai Indians										
Punjab Kings										
Rajasthan Royals										
Royal Challengers Bengaluru										
Sunrisers Hyderabad										

Quick reminders

- **From the app** (copy from the Judging page): **Avg rating 20** · **Value 20** high-rated players for low money · **Combo 10** all role groups equally strong · **Bat–bowl 10** left/right, pace/spin, bat vs bowl
- **You score: Strength 15** match winners, no weak link · **Versatility 10** multi-skill players · **Batting 6** · **Bowling 6** · **WK & field 3**
- Winner: highest **average** total. Ties: Avg rating, then Value, then Strength, then a judges' vote.

Notes:

College IPL Auction · judging criteria. The criteria and points match the Judging page of the auction app.
